Project Title: Medieval Weapons Website

This website includes information about the history of & It would likely consist of multiple pages describing different categories of weapons and short descriptions for different types. Navigation would be at the top, but also possibly through a main homepage that would link to different sections with images / buttons. I want the website to feel cleanly organized and sectioned, but also to feel more playful / simple / possibly illustrated, rather than too modern, to match the subject.

1. **Home Page** - a landing site & basic introduction, historical context
2. **Swords / Blades**
3. **Blunt / Other Handheld Weapons**
4. **Polearms**
5. **Bows**
6. **Sources**
